GREAT ORE BEDS IN MOHAVE COUNTY

Facts and Figures.

figure. The brief mention in papers publishing mining news has not generally been fidence in the deposits of this section.

If your space will permit I desire to say something of the district as it appears to a and twelve of Mineral Park. practical miner, without employing that vague and inexplicit manner of statement usual, when the plain facts and figures will not bear inspection; and without the most remote intention of pandering to any interest.

The general tone of mining corresponperity of a camp, to protect. For thirty board, and the young man clasped the young bearing quartz and argentiferous galena. though expecting some one whom he sineast are the Peacock mountains, in which companion in a long, loying and businessthe Hackberry and other mines are located; like manner, and then he kissed her. Somewhile just to the southwest lies the great how he seemed to feel that he had not made deposits of low grade ore and small ledges he repeated in a sort of Emma Abbott way. Havre. of very high grade. Although the ores of This struck him as being quite the thing the district are base, it is an undisputed fact that they are being worked to 95 and 96 per cent. by the mill at this place. Miners receive 80 per cent. of the assay value of silvers to nine this morning, unfounded. Rumor that they are silvers possible style. He classed her ver ores, less 15 per cent. for shipment and with every possible style. He clasped her discount on bullion, less again \$50 per ten for milling and \$2.50 for pulp assay. Action begins assay. Action begins assay to braced her slowly and impressively—then to Florence, Tucson and Tombstone. cordingly, \$150 ore delivered at the mill nets he hugged her as if he had firmly resolved the miner \$49.50 per ton; \$200 ore nets never to go into any other business as long \$83.50, and \$1,000 ore nots \$627.50, out of as he lived, and then he thought he heard which the miner most pay for hauling, and material at the following rates: Powder, turned into Broad street, and having joined fuse, per 100 feet, \$3; steel, per pound, 40c, coal yard, they repeated the Walton street

small ledges of rich ore, but inquiry about their locations adduces the fact that they have "big lodes" of lower grade ore, which performance. They did so. Both seemed they have held year after year, awaiting deeply affected, and the unseen audience such facilities for reduction as cheap trans- then was almost moved to tears at the exportation will bring; while the small strata tremely touching sight.
